## **DETAILED ACTION**

### ***Drawings***

1. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on 7/23/07 have been disapproved because they introduce new matter into the drawings. 37 CFR 1.121(a)(6) states that no amendment may introduce new matter into the disclosure of an application. The original disclosure does not support the shield element, such as a flat plate, can be placed over the exposed cutter head to prevent contact with the sharp edges of the cutter blade as shown in Figs. A-C.

### ***Specification***

2. The amendment filed 7/23/07 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: a shield element 14, such as a flat plate, can be placed over the exposed cutter head to prevent contact with the sharp edges of the cutter blade as shown in page 10 line 24-26.

Applicant is required to cancel the new matter in the reply to this Office Action.

### ***Claim Objections***

3. Claims 4, 6 and 10 are objected to because of the following informalities: The parentheses should be removed for clarity. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

Art Unit: 3725

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claim 9 is finally rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification fails to sufficiently describe the invention claimed in claim 9 so as to enable one of ordinary skill in the art to make the invention claimed without undue experimentation. It is not clear from the specification how to incorporate the shield element into the device.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claim 9 is finally rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 9: it is not clear how a shield element is incorporated into an access space and on the main frame to the cutting head as now shown in Fig 5.

***Allowable Subject Matter***

8. Claims 1-3, 5, 8 and 11 are allowed.

9. Claim 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, first paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

10. Claims 4, 6 and 10 would be allowable if rewritten to overcome the objection, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

### ***Response to Arguments***

11. Applicant's arguments filed 12/18/07 have been fully considered but they are not persuasive.

In response to applicant's argument on page 4 that there is support for the shield in the specification and the rejection and objection are not proper and should be withdrawn. The examiner would like to point out that although there is antecedent basis for the "shield" per se in the disclosure, the original disclosure does not provide support for a shield element, such as a flat plate, can be placed over the exposed cutter head to prevent contact with the sharp edges of the cutter blade as shown in page 10 line 24-26. Additionally, the specification as originally filed fails to sufficiently describe the invention claimed in claim 9 so as to enable one of ordinary skill in the art to make the invention claimed without undue experimentation

### ***Conclusion***

12. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3725

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
